“Management of Myasthenia Gravis in 2025 and the Use of Biologics”

Michael (Mike) W. Nicolle

MD FRCPC D. Phil.

Professor of Neurology

Western University

London, Ontario

Learning Objectives:

- To be familiar with the immunopathophysiology of MG including the role for pathogenic antibodies and complement.
- Be familiar with biologics used to manage severe and/or refractory gMG, including complement and FcRn inhibitors.
- When faced with a patient who has severe/refractory gMG, be able to rationally choose between the available agents for treatment (aspirational!).

For physicians recording their hours, visit: cumming.ucalgary.ca/departments/dcns/attendance
