

PaCES Research Team Seminar:

Pearls for Research productivity

David Hui, MD, MSc

Department of Palliative Care, Rehabilitation and Integrative
Medicine

Department of General Oncology

UT MD Anderson Cancer Center, Houston, USA

dhui@mdanderson.org

*Palliative Care... “above all is concerned with journeys of **discovery**. For **patients**, a discovery of what is most lasting and important for them as they unravel some of the knots of deceit and regret; for **those who love them**, the discovery of their own strengths in new roles, to help them to live on and finally to find something new to live for; for **all the staff**, the continual search for medical, nursing and counseling excellence.”*

Dame Cicely Saunders, *Pall Med* 1987: 1(1): 57-61

What is Research Productivity?

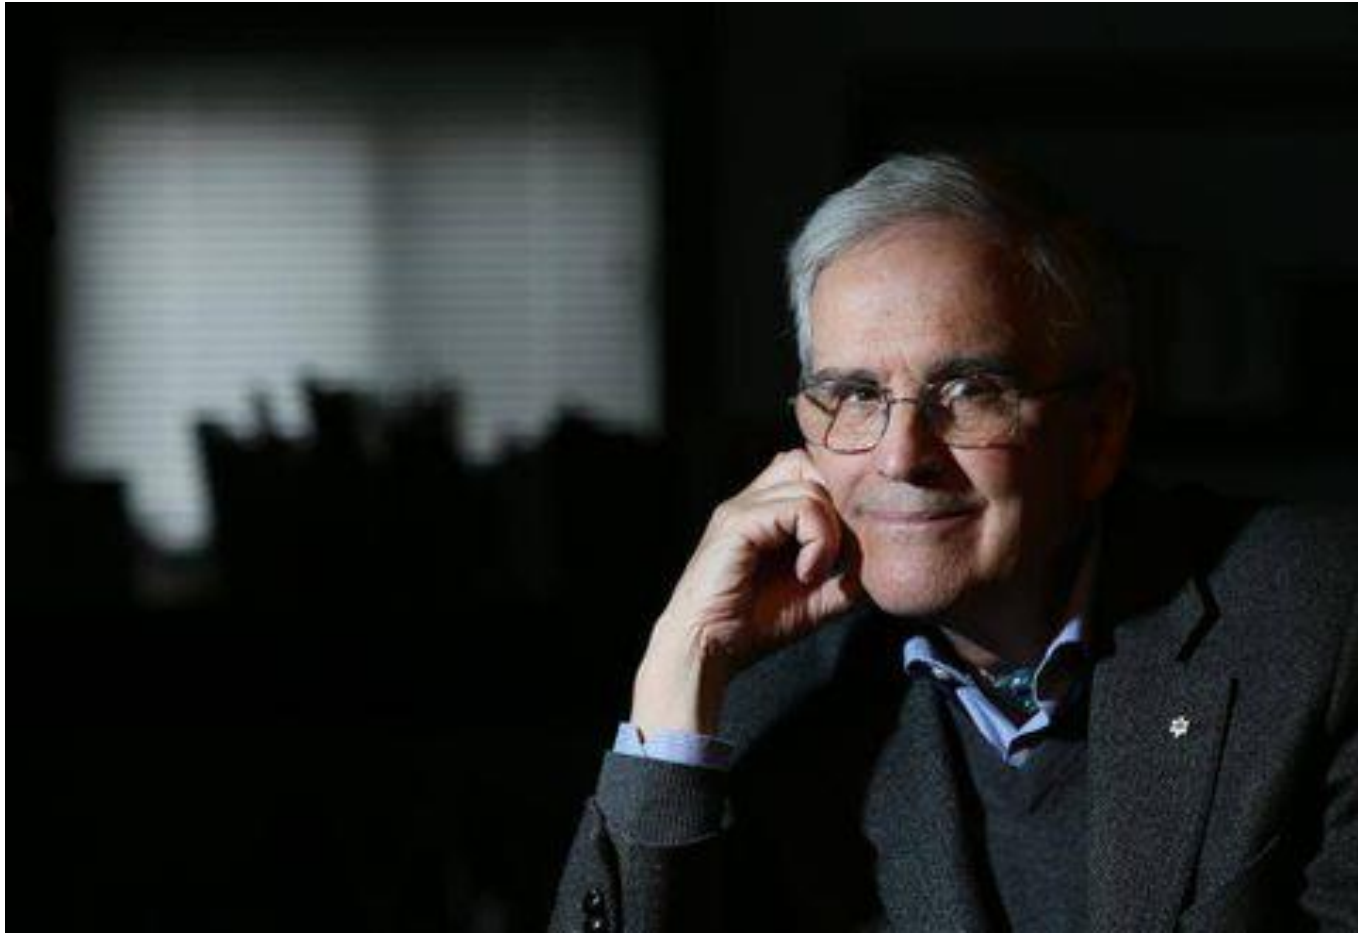

- Number of papers and associated journal impact factors?
- Number of citations?
- Number of grants and dollar amounts?
- Clinical impact?
- Personal satisfaction?
- Happy boss?

Pioneering Research

“Yes. In the last 40 years we’ve seen improvement in the care of the dying. But I think the question is, ‘Why hasn’t there been more improvement?’”

Balfour Mount 2019
