

Clinical Pharmacology Subspecialty Consultations

Clinical Pharmacology (CP) is a physician-based medical subspecialty that focuses on the application of pharmacological principles and methods in the real world. It is based on in-depth knowledge of human pharmacology, pharmacokinetics, pharmacogenomics, and toxicology.

The goals of this service include the following:

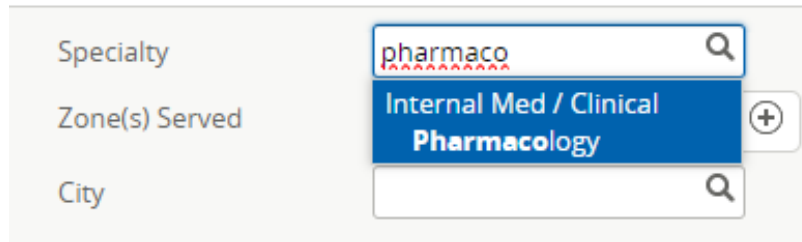

- Diagnosis and management of medication-related adverse drug events
- Decreasing adverse drug events in and out of hospital
- Decreasing the use of unnecessary medications
- Decreasing in-hospital and out of hospital drug costs through rational use of medications
- Education of physicians, residents, nurses, and allied health on safe and rational medication use

Physicians and Nurse Practitioners are encouraged to call the physician on call for Clinical Pharmacology (CP) with questions about patients with any of the following issues:

- Suspected adverse drug events of any kind (e.g., cutaneous adverse reaction, new prolonged QTc on ECG, drug induced liver or renal injury, abnormal laboratory results secondary to drugs)
- Polypharmacy/overprescribing questions
- Deprescribing (advice on reducing or stopping medications that are no longer needed)
- Unusual or unpredicted responses to therapeutic use of medications (unexplained inefficacy or toxic effects)
- New or unusual drug interactions
- Supra or subtherapeutic drug concentrations
- Restarting medications after an adverse event
- Management of therapeutic drug discontinuation/withdrawal syndromes (e.g., SSRIs)
- Interpretation of pharmacogenomic testing results

The Clinical Pharmacology Consultation Service is available from 8am-5pm, Monday to Friday (excluding stat holidays). Physicians with subspecialty training in Clinical Pharmacology and/or Medical Toxicology cover the service. A consultation can be requested through any of the following methods:

1. Alberta Netcare e-referral (under Health Services Catalogue / Specialty, select Internal Medicine/Clinical Pharmacology)

The image shows a screenshot of a web form with three fields: Specialty, Zone(s) Served, and City. The Specialty field is active, showing a search bar with the text 'pharmacology' and a magnifying glass icon. Below the search bar, a dropdown menu is open, displaying 'Internal Med / Clinical Pharmacology' in a blue box with a white plus sign to its right. The Zone(s) Served and City fields are currently empty.

2. [Specialist Link](#) (for Calgary Zone area Primary Care Networks)
3. AHS Insite Regional on Call Application (Choose any site → Internal Medicine → Clinical Pharmacology Consults). CP can be consulted at any of the five acute care hospitals in Calgary.
4. Selecting “Inpatient Consult to Clinical Pharmacology” in Connect Care and then contacting the Clinical Pharmacology physician on call. CP can be consulted at any of the five acute care hospitals in Calgary.
5. **Coming in Spring 2025:** Clinical Pharmacology will be joining both the Connect MD (Edmonton Zone) and RAAPID/Access Advice (North, Central, and South Zones) group of physician consultants to cover the entire province.

More information about the CP consult service, CP education, and the CP physician group is available by clicking the following:
