

2016 HODSMAN LECTURE

New Frontiers in CPR

Featuring Brian Grunau, MD, Scientist

Dr. Brian Grunau is a Clinical Assistant Professor in the University of British Columbia's Department of Emergency Medicine and has provided medical consulting services to B.C. Emergency Health Services and the B.C. Ambulance Service. He is also involved in the study of cardiac arrest in the Vancouver Coastal Health region locally and has developed protocols for patients resuscitated from out-of-hospital cardiac arrest for Providence Health Care emergency departments. Anaphylaxis and allergic reactions in the emergency department has also become a central focus of Dr. Grunau's research agenda as he attempts to provide data to assist evidence-based care.
