

## Newsletter Updates

We're introducing some minor changes to make the newsletter a more effective communication tool!

- Submissions will run for a period of **one week** unless specified
- Body copy will be edited at the discretion of the editor to optimize communication
- Deadline is Tuesdays at noon

Thank you for your cooperation :) If there are any concerns, please email me at : natalie.sun@ahs.ca

### Connect Care Update

A few points to be aware of in Connect Care moving forward:

#### 1) Adding Yourself to Provider List:

Don't forget to add yourself to the Treatment Team list for admitted patients who are waiting for a bed to be transferred to another site. When patients get admitted in Connect Care they will automatically drop of your 'My List' tab and it is easy to lose track of admitted patients who are still our responsibility (this is primarily for patients admitted to urology from non-RGH sites; also applies to neurology admissions to SHC from RGH). To do this simply click the 'Tx Team' button and add yourself back to the list as a Consulting Physician after the admission order is entered. NB - When handing these patients over, the doc receiving the patient will have to take the same steps (ie - the patient will not automatically 'push' to them when you sign out).

#### 2) Specifying a provider for Inpatient Consults:

When ordering an inpatient consult (eg - to hospitalist, GIM, surgery, etc) we do **NOT** have to specify an individual provider; simply enter the consult to the service and it will show up on their list. If you also specify an individual provider (eg - staff doc on call) it will also populate their individual list, which is leading to some confusion / double documenting, especially for services that don't typically have residents (eg - hospitalist). So don't do it.

#### 3) RGH Eye Clinic Referrals:

When making a next-day referral to the RGH eye clinic, you must **ALWAYS** enter the Ambulatory Referral order to the clinic in the Dispo tab, even if you already have received an appointment time (whether from the resident on call or RAAPID). The referral order populates their clinic list, and without it they may not know the patient is coming. You can specify the appointment time in the Comments section of the referral if you want but this doesn't appear to be mandatory.

#### 4) @EDCOURSE@

There still seem to be a large number of docs who are not including the .edcourse smartphrase in their note template. If you have not been using this function, please consider adding it to your notes. The frustrating

In Basket messages requesting our signatures for post-handover updates to the ED Course are now a thing of the past, making this a much less onerous request. Because critical information is often included in this section (Discharge plan, meds, etc) it is immensely useful to have it included in all your primary notes (even for many non-handover patients). Please consider including it in your primary note - downstream docs and pharmacists will thank you!

If any of this sounds completely confusing, or if you have any other comments / questions please let me know. — Chris Hall

## **FMC Level 1 Trauma Process Simulation**

FMC Level 1 Trauma Process Sim will have its final session before summer on June 28 11am-2pm. These sessions are now multi-disciplinary and will be attended by a trauma surgeon. We are looking for a minimum of 2 participants, but can accept up to 4. Ideally to be attended by an FMC EDMD who has not yet attended this simulation. However it is open to any EDMD in the city. Thanks for considering.

---

## **Where is the CED found in Alberta Netcare?**

There is now a Community Encounters Digest section on Netcare. A family doctor that has signed up for this (so far about 50% of Calgary and growing) is listed at the top of Netcare for each of their patients. Also, there is a summary of the patient's visits to their family doctor (visit reason, and ICD code). We are hoping this becomes helpful to ER docs so that they can see if a patient presenting to ER has recently been seeing their GP for the same reason (ex. this can avoid duplication of referrals).

The CED is found in a folder in the Clinical Document Viewer Tree in Alberta Netcare called Community Reports. Every Albertan who has visited a CII enabled provider in the past 12 months has a CED in their Alberta Netcare record. Newer versions of the CED will replace any prior versions in Alberta Netcare. An updated version will show as bolded (unread) for Alberta Netcare users.
