

What is DORS?

DORS is the Digital Overdose Response System, an App that will help protect you if you are using alone. First, you register with your mobile phone number and provide your location. Then, when using alone, you start a timer in the App. If the timer expires or you need help, the App will call for help and summon medical support if you need one or are unresponsive.

Download the DORS app from Google Play or the Apple App Store and follow instructions for registration and set-up.
