

COMBINE

# Biomedical Technology and Business

at the University of Calgary

UNIVERSITY OF  
CALGARY

# Master of Biomedical Technology/Master of Business Administration (MBT/MBA)

*The Haskayne School of Business and the Cumming School of Medicine recognize that several professions call for a combination of skills in both disciplines. Through a multi-disciplinary approach, the combined MBT/MBA program exposes students to a broad range of recent concepts and cutting-edge technologies.*

*Successful graduates of the MBT/MBA program are well-prepared for roles at the interface of science and in industries such as management of health sciences within regulatory bodies and entrepreneurship in technology.*

## **ABOUT THE PROGRAM**

Students will typically complete their first year of studies in the Cumming School of Medicine and their second and third year in the Haskayne School of Business. To complete the MBT program, students must complete 8 months of business and science courses and 12 weeks of paid industry work experience. Students must also complete 18 MBA courses, including four electives and 14 required core courses.

The MBT program consists of a comprehensive course package, which ensures the acquisition of a wide range of practical competencies and extensive knowledge of concepts in a variety of biomedical disciplines. The MBA program includes a well-rounded approach to business, including courses focused on advanced leadership, business technology, entrepreneurial thinking, finance, and marketing.

## **ABOUT THE UNIVERSITY OF CALGARY**

As a comprehensive academic and research institution, the University of Calgary inspires and supports discovery, creativity and innovation across all disciplines. Graduate science education at the Cumming School of Medicine is in an interdisciplinary training community that combines countless opportunities for collaboration and mentorship with internationally renowned researchers. The Haskayne School of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB), a seal of quality held by less than five per cent of the world's business schools.

## How to Apply

Applicants must apply and be admitted to both the Cumming School of Medicine and the Haskayne School of Business in order to be admitted to the Master of Biomedical Technology/Master of Business Administration (MBT/MBA).

A separate application must be submitted to each faculty.

*If you have completed the first year of either the MBT or MBA program, you can still apply for the combined MBT/MBA program by meeting the normal application and admission requirements for the other faculty.*

## Admission Requirements

### CUMMING SCHOOL OF MEDICINE MBT:

- A four year bachelor's degree in biology, engineering, agriculture, chemistry, kinesiology or equivalent, with a minimum 3.30/4.00 GPA in the last two years of study.
- Two references

“Taking the joint MBT/MBA program through University of Calgary has been immensely valuable for me in the healthcare and life sciences field. I always say that the MBT got me in the door at Calgary Laboratory Services and the MBA kept me there. It was through my MBT practicum placement that I successfully secured a position with the lab, while my business background allowed me to continue growing my career within the organization. I now feel more confident making decisions in the workplace and understanding how to analyze information because of my science-business background.”
