

# Help us learn more about brain development in children born very preterm

## Study participation involves:

- 2~3 visits to Alberta Children's Hospital over 12 months
- Answering questions about your child
- Playing attention games
- MRI scan of your child's brain
- Participating in an educational computer game program (optional)

Parents will receive up to **\$225** in compensation for completing the study.

If you have a son and/or a daughter aged 4-6 years old who was born **< 32 weeks gestational age**, please contact Dr. Signe Bray at [slbray@ucalgary.ca](mailto:slbray@ucalgary.ca) or 403-955-7440 for more information.
