

# Help us learn more about how kids' brains develop in Autism Spectrum Disorder

If you have a child between **ages 3-6** with a diagnosis of **Autism Spectrum Disorder**, you may qualify for our research study!

Participation involves 1-2 visits to the Alberta Children's Hospital:

- Your child will play some simple computer games
- We will measure your child's brain waves with EEG (electroencephalography) while watching a movie of their choice (no sleep deprivation!)
- You will be asked some questions about your child

If you are interested or would like more information, please contact **Dr. Signe Bray**  
[slbray@ucalgary.ca](mailto:slbray@ucalgary.ca)  
403.955.7440

**Study ends 2020**

Your child will receive a **small gift** as a thank you
