

Resident Education Scholars Program (RESP) Resource Information

Congratulations, and welcome to the Resident Education Scholars Program (RESP)! The Office of Postgraduate Medical Education (PGME) and the Office of Health & Medical Education Scholarship (OHMES) are excited to support your scholarly pursuits. The RESP has been designed to provide support to develop, conduct and report on your scholarly project in medical education, and the following resources are available to guide you in this process:

[Resident Education Scholars Program Terms of Reference](#)

This document provides a description of the program including goals, outcomes, entrance requirements and selection process, curriculum overview, and structure.

[Resident Education Scholars Program Webpage](#)

This dedicated webpage is housed on the website of the Office of Health & Medical Education Scholarship, and includes the on-line learning modules which provide an overview of various aspects of the scholarship process, as well as links to external resources.

[Resident Education Scholars Program Learning Plan](#)

This document provides a checklist of milestones and deliverables for your RESP project to ensure that it is completed in a timely manner.

RESP Community of Scholars

One of the goals of the RESP is to advance education scholarship in the CSM through the addition of new scholars to the community. Quarterly on-line sessions will be scheduled for residents, preceptors and OHMES scholars, during which residents will briefly present their research idea/proposal at different stages of development in order to receive feedback from the RESP Steering Committee as well as other participants. Attendance is strongly encouraged, and we will email you more information when the sessions are scheduled.

[OHMES Membership & Mail List](#)

OHMES has over 230 members in the University of Calgary and beyond (see full listing in our on-line database). We strongly encourage you and your RESP Preceptor to join the local med ed scholarship community by becoming a member of OHMES. As a member, you will be added to our mail list which includes announcements regarding internal and external events and funding competitions.

[Medical Education Specialization Journal Club](#)

The Office of Health and Medical Education Scholarship and Department of Community Health Sciences host a weekly medical education journal club. It is designed for students, faculty, educators and researchers to discuss research in the field of medical education. The journal club meets most Mondays 12-1pm during the academic year, with different themes/topics each month. You are welcome to attend!

[OHMES Events](#)

OHMES hosts health/medical education scholarship events throughout the academic year which include seminars, a symposium, and external webinars offered by the Canadian Association for Medical Education. All events are free, and only require an OHMES membership to attend. We encourage you to attend!

[Meeting Room](#)

OHMES has a dedicated 8-person capacity meeting room in the Heritage Medical Research Building (G253) which you are able to book for meetings related to your project. It has teleconferencing and videoconferencing capability, and can be used to meet with your RESP Preceptor, OHMES Scholar, etc. Contact ohmes@ucalgary.ca to book.

[Contact Information](#)

Contact ohmes@ucalgary.ca for any questions related to the RESP or OHMES events/resources.
