

Connector Construction

Connector construction update

We would like to continue to thank everyone for their patience, flexibility, support and significant contribution to the Connector construction activities so far.

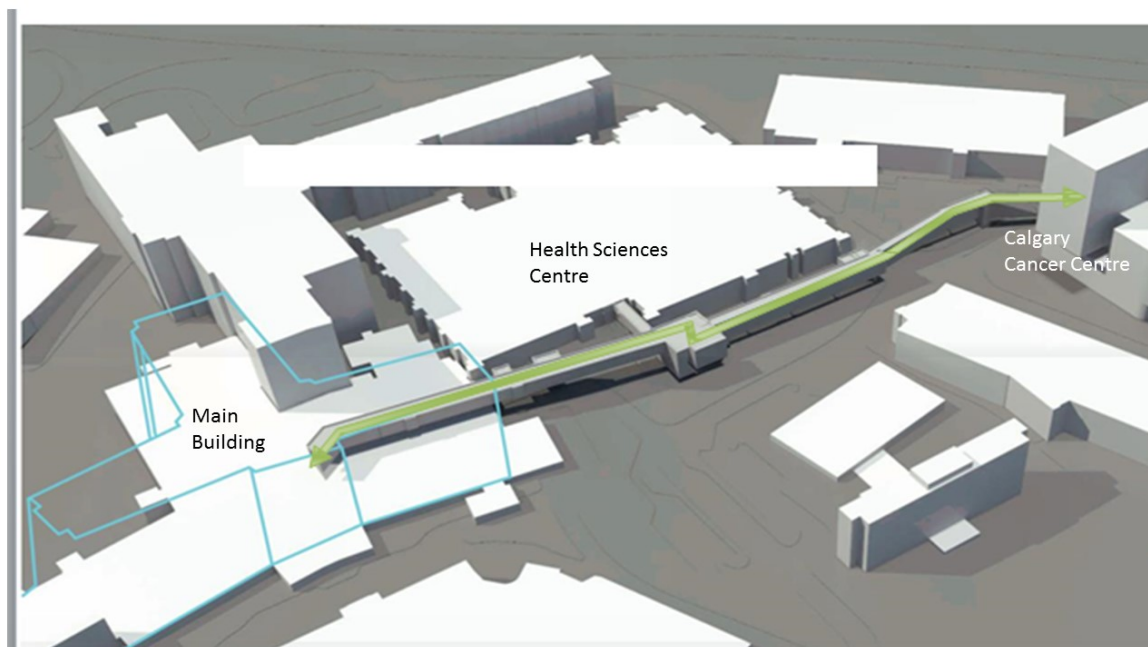

These contributions are directly enabling critically important construction activities to be completed, in turn which will see us opening a much needed new Calgary Cancer Centre for our patients and families.

This update provides information about lane closures related to installation of the Connector support structure over Hospital Drive North.

Background

An important aspect of the construction related to the Calgary Cancer Centre Project (CCP) is the Connector, a 400 plus metre physical pathway which will accommodate the flow and/or movement of people and materials between the new Calgary Cancer Centre (CCC) and other buildings at FMC. Most of these flows are bi-directional, and will allow for movement of patients and families, the public, physicians, staff, students, researchers, and materials across the site. The Connector will provide a direct link between the CCC, the Main Building and the HSC. It will also provide a route for infrastructure connections such as a pneumatic tube system.

Connector Route

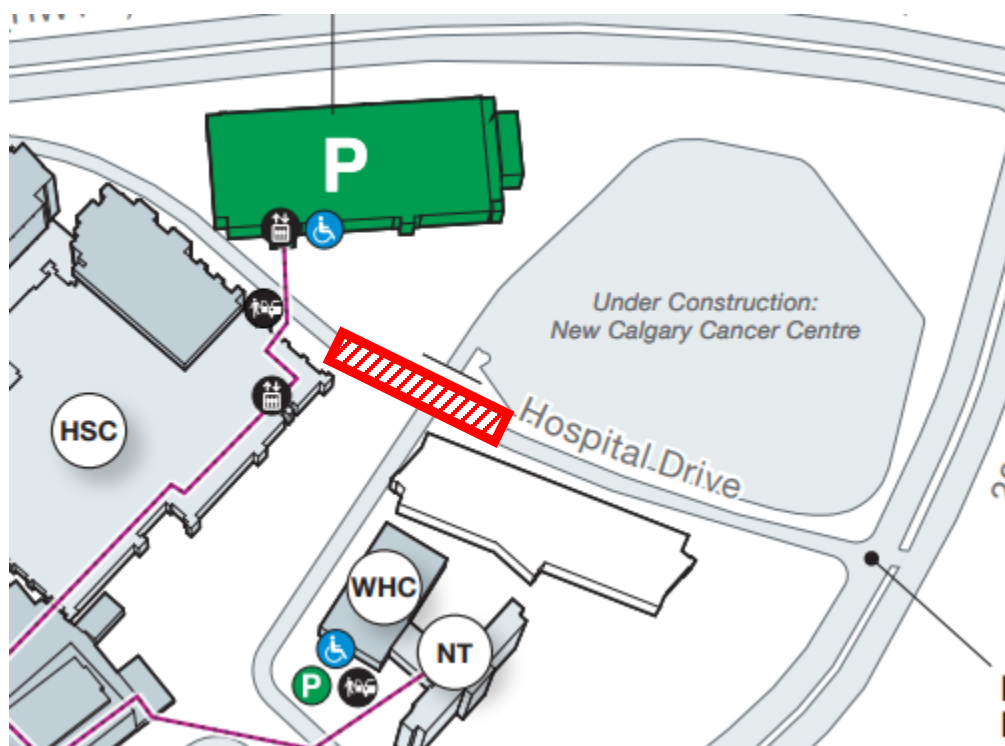

Connector Construction

Connector span construction over Hospital Drive North

To enable the support structure for the Connector to be installed over Hospital Drive North, two types of lane closures will be required starting Friday evening on the 5th March, running to early Monday morning on the 15th March.

Impacted area of Hospital Drive North

Friday 5th March at 5pm until Friday 12th March at 5pm

Hospital Drive North will be reduced to a single lane in either direction for this period. The roadway just to the west of the Women's Health Centre, "Helipoint Rd", will remain open to Northbound traffic only and Calgary Transit routes will be unaffected.

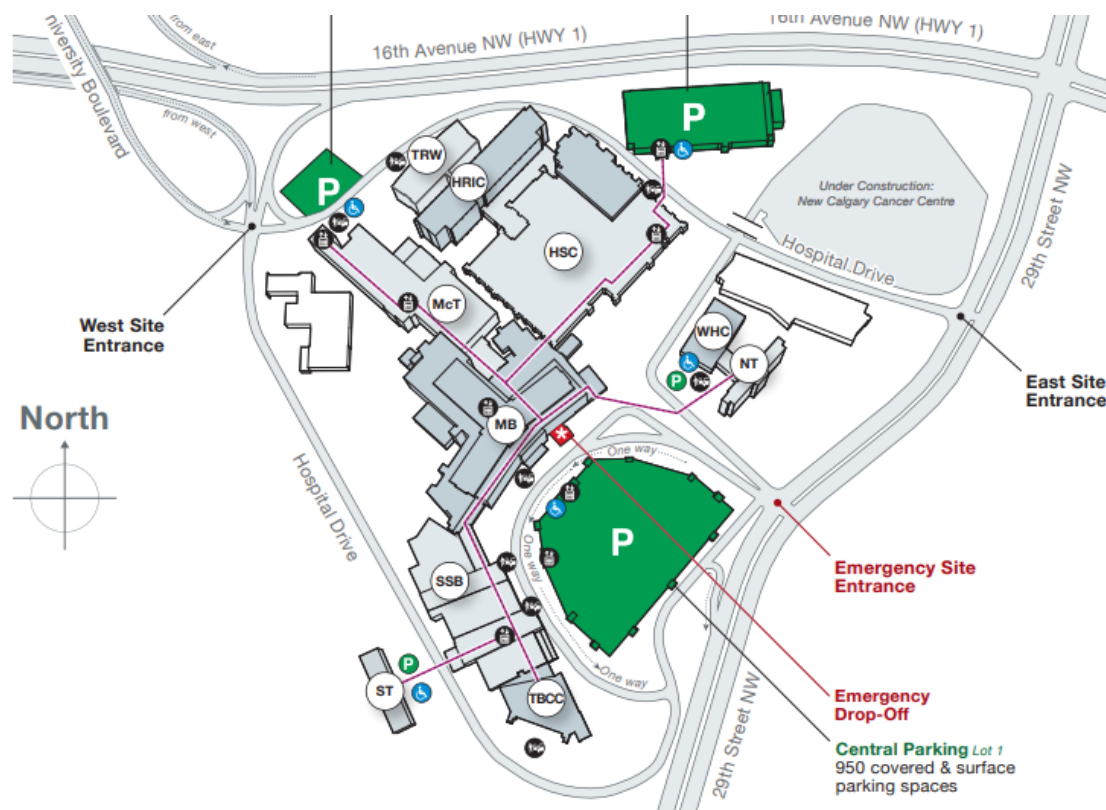

Flaggers and signage will be in place to assist with vehicle flow.

Connector Construction

Friday 12th March at 5pm until Monday 15th March at 6am

For this weekend only this section of Hospital Drive North will be closed completely. Entry to and exit from North/Lot 6 parking lot will be provided from the West Site Entrance only and entry to and exit from Lot 8 will be provided from the East Site Entrance only.

Two way traffic (North and South bound) will be provided during this time on Heliport Rd, and Calgary Transit routes will be unaffected. Flaggers and signage will be in place to assist with vehicle flow.
