Are you a parent of a child with *Tourette syndrome*?

Please consider participating in our study: Communication in children with Tourette syndrome survey.

What?

An online survey about how your child communicates. It will take about 30-40 mins.

Why?

Some children with Tourette syndrome have trouble communicating and some don't. We want to understand communication in Tourette syndrome so that we can plan better interventions for children.

Who?

Parents of children 8-16 with a Tourette's diagnosis.
