Subject: [Clinical-researcher-l] COVID VACCINATION ROLL OUT PHASE 2C
Attachments: Vaccination under Phase 2C_UC CSM Template Letter_16 April 2021.docx; ATT00001.txt

We have consulted with Alberta Health and ascertained that staff who meet the following criteria qualify for the COVID Vaccination under Phase 2C of the vaccination roll-out:

- Employee of the University of Calgary
- Duties involve direct in-person patient contact or work in a medical laboratory that processes human samples.

If you have staff reporting to you who meet the above criteria, please consider using the attached letter template to provide your staff with an Employer letter to support their vaccination request.

Please note that an Employer letter verifying staff's qualification under Phase 2C will be helpful, but is not mandatory.

Please direct any questions to sabine.moritz@ucalgary.ca.
