Grant Development "Micro"-Tip

A great way to build your grant writing skills is to read grants from other researchers. Our Internal Peer Review website has many past successful grant applications for you to learn from and more are available upon request. Pay attention to how successful grant writers format their grants, highlight the importance and significance of their work and effectively use all sections of their application.

Funding Opportunities

**CIHR - Operating Grant: Joint Programme on Neurodegenerative Disease Research (JPND) 2022**

JPND launches this joint transnational call with the aim of improving the understanding of the mechanisms and biological substrates that underlie non-
pharmacological interventions in order to tailor a holistic personalized treatment approach. The topic of the call is the development of new analytic tools and pathways to accelerate diagnosis and facilitate diagnostic monitoring of rare diseases. The specific objective is to establish a number of ambitious, innovative, multi-disciplinary and multi-national collaborative research projects that aim at understanding the biomedical, psychological and/or social mechanisms of non-pharmaceutical interventions in order to identify potential target sites for enhanced personalized interventions or a combination of pharmacological and non-pharmacological interventions.

Research Services’ final internal deadline for the full application is noon on Thursday, June 23, 2022.

**CIHR - Team Grant: Mental Health in the Early Years Implementation Science**

The goal of the Mental Health in the Early Years (MHITEY) Implementation Science Team Grants funding opportunity is to fund implementation science research that enhances our understanding of how to improve the systematic and equitable implementation of evidence-based interventions for young children (i.e., girls, boys and gender diverse children ages 0-5) and their caregivers that address one or more of the following areas:

1. Promotion of positive socio-emotional development and mental health in early childhood;
2. Prevention of the development of early childhood mental health issues; and
3. Treatment of young children living with or at risk of developing mental health issues through integrated, coordinated and person-oriented care.

Research Services’ final internal deadline for the full application is noon on Monday, June 20, 2022.

**Genome Canada: Genomic Applications Partnership Program (GAPP) July 2022 (Round 23)**

Genome Canada, in partnership with Genome Alberta (GAB), is seeking proposals for the Genomic Application Partnership Program (GAPP). The GAPP funds downstream research and development projects driven by challenges and opportunities identified by end-users such as industry, government, not-for-profits, or other receptor organizations. This is an ongoing competition and Expressions
of Interest for Round 23 of the competition must be submitted to Genome Alberta by April 18th, 2022, for submission to Genome Canada in April.

Interested parties are asked to contact Genome Alberta in advance of providing the EOI for submission, cc’ing ipd@ucalgary.ca to engage University of Calgary Research Services support.

To see other active funding opportunities, visit the Research Services Office (RSO) funding calendar.

**OADR Grant Development Webinar**

**Research Metrics: Supporting Claims of Research Impact**

**Date:** May 3, 2022  
**Time:** 10:00 am - 11:00 am MST  
**Register**

Following last month’s presentation on DORA and Research Impact, this presentation will focus on the practical application of research metrics in support of claims of research impact. Researchers at University of Calgary have access to both Scopus and SciVal, providing them with a comprehensive suite of research metrics (e.g., bibliometric indicators) and altmetrics (e.g., social media and policy and clinical citations) that can be used to assess some aspects of research impact. Participants should leave the session with an understanding of the diverse research metrics currently available to them, the ability to access those metrics, and suggestions for how to use these metrics to gain a competitive advantage in research grants and award proposals.

**Speakers:**  
*Kyle Demes; Elsevier’s Research Intelligence Consultant in Canada*

**Research Support Environment - U of C Library**
The Library is one of several units on campus that supports researchers’ compliance with the 2021 Tri-Agency Research Data Management Policy.

The library provides:

- Consultation and assistance in developing a Data Management Plan using the DMP Assistant
- Support to create appropriate metadata for your research data.
- Access and information on repository services including:
  - PRISM Dataverse – University of Calgary’s data repository
  - Guidance on depositing to other data repositories (big data, discipline-specific repositories)
To learn more about research data management and library services, see our [research guide](#) or contact [research.data@ucalgary.ca](mailto:research.data@ucalgary.ca).
