

# OnCore Clinical Trial Management System

## Because...

### Good People Need Good Tools to do Good Work!

#### Subject Management

Efficiently track your subjects and their progress through the study. Subject calendars are customized with visit dates based on the protocol and tolerances. Documented subject activities flow to invoicing and Connect Care.

#### Streamlined Invoicing

Invoicing work just got easier. With OnCore, your sponsor invoice is sent over the Accounts Receivable integration to PeopleSoft nightly and then Accounts Receivable will tell OnCore when that invoice is paid. No need for invoice request forms!

#### Key Integrations

OnCore integrates with several systems to reduce double-work. Access to OnCore is provided through a single-sign-on to your institution. Ethics information flows from IRISS to OnCore and then protocol and subject statuses flow to Connect Care, ensuring your hard work is captured and communicated throughout key systems.

#### Coordinator Community of Practice

Join us monthly for the Coordinator Community of Practice. These fun working events are designed to give you access to CCCR staff and OnCore Specialists while working on your OnCore skills, no matter your skill level. Meet other OnCore users and get fabulous OnCore merch. Bring all your CCCR questions, concerns, ideas. We'll bring the snacks!

#### Provincial OnCore Support Team (POST)

Our team is dedicated solely to making OnCore work for you. We build your protocols, calendars and budgets. We supply Job Aids and online training to assist you in OnCore tasks.

#### Ask us anything!

Book a support session or send us an email.
