New Open Educational Resources (OER) Supports

This summer, Libraries and Cultural Resources (LCR) has introduced a new course materials support service called [Open Course Materials Matching Services \(OCoMMS\)](#) which is supported by the Open Educational Resources (OER) Support Team. We are working to support faculty and instructors in finding relevant [Open Educational Resource \(OER\)](#) options for courses at UCalgary through this service.

LCR has also recently published an [OER by Discipline Guide](#) organized according to the faculties and departments at the University of Calgary. If you find that there are open educational resources you are using which are missing from this guide, we would be happy to incorporate those resources into this guide. You can self-report through the [OER Adoption Form](#) or email us at oer@ucalgary.ca to let us know.
