

These training cases were developed for the CIHR-funded study "Testing the World Health Organization's 11th Version of ICD" led by Cathy Eastwood, Danielle Southern, Alicia Boxill, Bill Ghali, Hude Quan, underway at the University of Calgary, Department of Community Health Sciences. This study involves coding 3000 full inpatient discharge records using ICD-11.

These cases were reviewed by Cathy Eastwood and Natasha Hanus.

Codes were updated as of April 7, 2018.

Condition	ICD-11 Codes with Description	Comments
Delirium on Dementia		
Depression without psychoses		
Incisional hernia		
Urinary tract infection with Bacteraemia due to E.Choli		
Brain metastases originating from malignant melanoma		
Pelvic infection following ectopic pregnancy		
Paralysis with weakness and fatigue		
Rheumatic mitral valve stenosis and mitral insufficiency		
Leiomyoma of Uterus		
Psychosis with delusions caused by epilepsy		
Immobility		
Benign neoplasm in ascending colon		
Delirium		
Bulimia		
GI Bleed with angiodysplasia of colon		
Viral meningitis		
Glioblastoma of the brain in right temporal lobe		
Skin cancer - melanoma with metastases to liver, lung, retroperitoneum		
Nephrotic syndrome, uncontrolled Type 2 diabetes		
Diabetic ketoacidosis. Type 1 diabetes uncontrolled and Hyperkalemia		
Acute MI		
Acute cholecystitis and gall stones		
Influenza virus		
Malignant brain cancer, right frontal lobe		
Hydrocephalus		
Septic shock		
Myelopathy, C4-7 cervical vertebrae		
GI Bleed in jejunum		
GI bleed with gastric ulcer and malignant neoplasm of stomach - adenocarcinoma.		
Malignant neoplasm of the spinal nerves involving the L1-5, coccyx, and T12 vertebrae		
Sepsis due to proteus mirabilis		
Peripheral nerve tumor, malignant		
Left sided ovarian cancer, benign. Cystadenofibroma		
Seizure due to hyponatremia		
Hernia with Bowel obstruction and strangulation involving the ileum		
Benign tumor of the pituitary gland with adenoma and hypothyroidism		
Palliative care		
Ventricular tachycardia; CAD. LAD artery involvement		
Diaphragm hernia; bowel obstruction with gastric volvulus		
Small intestine obstruction		
Gastritis		
Unstable angina with narrowing of LAD and Ramus on heart catheterization		
kidney transplant rejection involving right hydronephrosis		
Benign Liver and bile duct tumor, liver cell adenoma		
GI Bleed		
Benign left ovarian tumor with serous cystadenoma		
hyperkalemia and chronic kidney failure with hypertension from Type 2 diabetes		
hydrocephalus		
acute obstruction of small intestine with Crohn's disease		
pneumonia with COPD		
Anorexia with very low body weight; bingeing and purging		
ACUTE NSTEMI
