

# Progress In Action – Our Commitment to Quality Improvement

Prepared by the UME Team

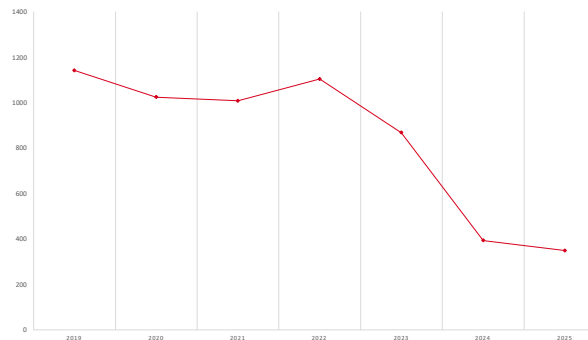

## Pre-Clerkship: Ratings of Legacy events VS RIME Events

Students in the UME program are asked to evaluate individual events. With RIME, the number of faculty have gone down, with the goal of more longitudinal teaching.

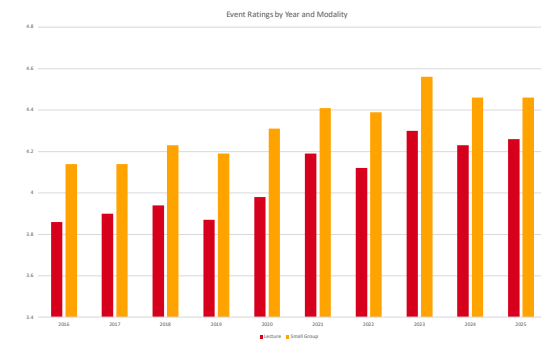

With 2.5 years of RIME teaching, we compared the evaluation numbers for RIME teaching against the Legacy program. Lectures were statistically significant in their improvement, with a mean of 4.08 in legacy and 4.23 in RIME with a p value of 0.0008. Small groups also improved with a mean of 4.37 in legacy and 4.54 in RIME,  $p < 0.0001$ .

Since RIME began we've seen a drop from over 1000 individual faculty delivering educational events, to a number less than 400.

Unique Faculty by Year

Event Ratings by Year and Modality

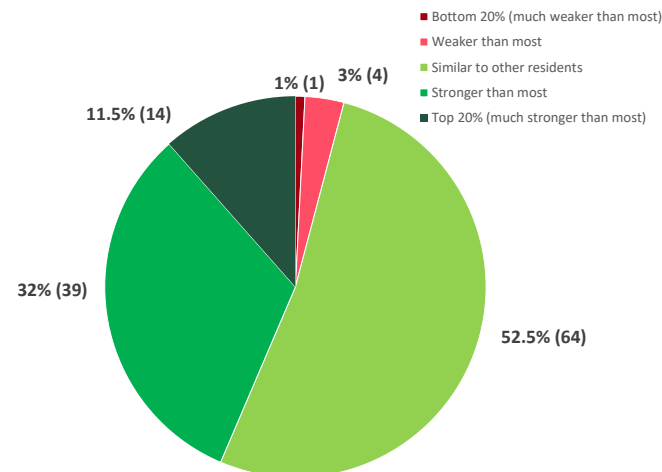

## Graduate Program Director Survey Results:

The Program Director Resident Survey is distributed annually to programs with CSM graduates. It provides feedback to UME regarding the proximal performance of our trainees relative to others, 6 months into training and aligns with accreditation requirements

### Results for 2025 Graduates (n = 122, 77% response rate)

- 53% of our graduates had demonstrated specific areas of strength or outstanding performance beyond that of the average resident in the program
- 6% has this resident required additional support beyond what an average resident in your program typically requires
- 96% of our graduates performed at or above their peers, with over 10% in the top 20% of residents and 30% stronger than most. Only 4% were weaker than most.

## Career Exploration Activities

The RIME Curriculum provides abundant activities that are built to help you explore your future path in Medicine. With three weeks of Career Development immersion, Career Conversation, Shadowing, and the exposure to a wide range of faculty across all the teaching modalities.

More? Check out this Med Student hosted podcast series called Specialty Café. Over 177 episodes and videos with profiles of physicians all about choosing your path in healthcare.
