

Yes, even animals can have asthma!

COMMUNITY PEDIATRIC ASTHMA SERVICE

Animals can have asthma too! Cats, dogs, horses, donkeys, rabbits, even otters! They take the same medications (a controller and a reliever) as we do and they even use a spacer! If you think that your dog, cat, or other pet may be suffering from asthma, click [here](#) to see a list of symptoms. Take a look at our furry friends!
