

CKD RESOURCES FOR PRIMARY CARE

The **CKD Clinical Pathway** can help you diagnose, medically manage, appropriately refer adults with Chronic Kidney Disease (CKD).

www.ckdpathway.ca

TELUS Health Electronic Medical Record (EMR) Outcomes Dashboard can identify CKD and CACP* eligible patients.

CKD patients can be identified via text/ICD-9 searches, visits/03.04J billing history, and abnormal labs. Dashboards offer ongoing monitoring and recall support for complex diseases.

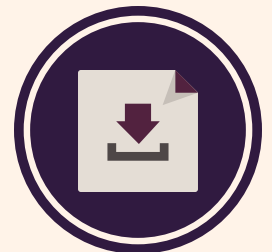

For more information: outcome.services@telus.com

TELUS Health EMR CACP* templates are self-populating with clinical guidelines and resources for CKD patients. This point-of-care template integrates CKD-specific goals, medical management, referral criteria and nutrition handouts.

Netcare eReferral can be used to obtain Nephrology Advice. This can be used at any time for non-urgent questions regarding your CKD patient.
