Sonosite PX

Advanced Image Clarity and Confidence

Inspired, informed, and improved by thousands of hours working side-by-side with clinicians on the front lines of medicine, Sonosite PX point-of-care ultrasound system incorporates the most advanced image clarity Fujifilm Sonosite has ever offered, to give clinicians an advanced level of confidence for diagnostic and procedural applications.

This isn’t just our most advanced point-of-care ultrasound solution ever, it’s YOURS.
Designed for the Human Touch

The human touch is crucial when it comes to point-of-care ultrasound. That’s why Sonosite PX has been designed around every detail for the way clinicians work and deliver care.

**Touch and Physical Controls**
Intuitive touch panel and physical buttons for quick access to the most-used controls. Unique raised buttons allow clinicians to make adjustments via feel. Sonosite PX can be operated with gloves and a sterile drape.

**Workflow Efficiency Features**
The streamlined user interface improves workflow, allowing clinicians to find controls quickly with fewer touches. Exam types are optimized with most-needed annotations and calculations.

Get Closer at the Point of Care

We listened and listened some more, working with clinicians across the globe. Sonosite PX was created and inspired by the way they need to deliver care, wherever they deliver it.

**Adaptable Positioning**
Adaptable horizontal to vertical work surface allows clinicians to adjust Sonosite PX for optimal bedside ergonomics and bring it closer to the bedside.

**Closer Access**
The low-profile wheelbase fits under most beds for closer access, especially important while operating the system across the bed. Front and side levers simplify height adjustments.

**Adjustable Height**
System height can be raised or lowered for a wide range of users.

**Adaptable Positioning**
Work surface adapts from horizontal to vertical with a push or pull of the handle.
Environment Inspired
Optimized for the way you move. The way you think.

The agile, small footprint Sonosite PX stand offers maneuverability and dedicated features to keep your system organized and stocked with the essentials.

Data Management and Connectivity
Wifi, Ethernet port, 1080p digital video output compatible with 1080p displays, (4) USB 2.0 ports, (2) USB 3.0 ports, (1) dedicated USB port for optional printer.†

Durable Transducer Holders
Integrated holders (no more cups) for simplified clean up and ease of use.

Triple Transducer Connect
Three transducer ports so your most-used transducers are at the ready with the touch of a button.

Versatile Storage Solutions
The flexible storage system adapts to left or right side needs—gel holder, wipes holder, storage bin, and lockable drawer to secure supplies.

Cord Management
Power cords are confined within the column to help prevent tangles.

Cable Management System
Cable catcher and hooks help prevent tangled transducer cables. Even at the lowest stand height, cables are less likely to drag on the floor.

Low-Profile Wheeled Base
The low-profile wheel base helps position the system close to the bedside.

Peripheral Accessories

Barcode Scanner
Save time by automatically linking patient data to the ultrasound scan. English only, where available.

Barcode Expressions
Auto-populate physician ID and patient information with customized software for your Sonosite Barcode Scanner. English only, where available.

Sonosite ECG Module
The 3-lead Sonosite ECG Module connects directly to the Sonosite PX ultrasound system through a dedicated ECG port. It allows the system to display an ECG trace on the clinical monitor. Includes ECG lead wire set.

Medical Grade Printer
Add the optional Black and White Printer to print ultrasound studies.

Needle Guide Starter Kits
Improve positioning to help guide needles to an exact target on the first attempt.

PowerPark Cordless Charging Station
Dock the system in a central location while the battery charges for cord-free use. Cord-free use eliminates power cords dragging on the floor, risking contamination. No power cords to clean and disinfect.

† Off the stand, Sonosite PX has (2) USB 3.0 ports.

Integrate Medical Informatics
Sonosite Synchronicity™ workflow manager supports seamless credentialing, quality assurance, and billing. Compile data from all connected point-of-care ultrasound systems into a central location.

Guide Needles Precisely
Auto Steep Needle Profiling helps in-plane needle visualization from multiple angles with one system interaction. The clinician simply advances the needle at the angle optimal to reach the target.

Education at Your Fingertips
Sonosite is dedicated to clinician education. More than 150 scan-along education tutorials are onboard for COVID-19, diagnosis, procedures, pathology, and system and transducer use.

Rest Assured with Data Security
Sonosite PX includes robust security features to keep patient information safe and networks secure. The system meets FIPS199, FIPS200, and NIST 800-53.
Scan with Confidence

Sonosite designs, manufactures, and tests transducers in-house. Our transducers aren’t only durable, they’re also made for superior imaging in the most demanding environments.

- IPX7 rated for immersion*  
- Drop-tested to 1 meter  
- Sonosite-manufactured transducers are covered by a Sonosite 5-year standard warranty

Optional Needle Guide Starter Kit
- CIVCO Infiniti Plus™ In-Plane Ultrasound Needle Guide  
- CIVCO AccuSITE™ Out-of-Plane Ultrasound Needle Guide  
- CIVCO Disposable Endocavity Needle Guide

C5-1  
5-1 MHz Curved  
Scan Depth: 4.7–30 cm  
Exam Types: Abdomen, Gynecology, Lung, Nerve, Musculoskeletal, Early Obstetrics, Obstetrics, Spine

C10-3  
10-3 MHz Curved  
Scan Depth: 3–18 cm  
Exam Types: Abdomen, Gynecology, Lung, Nerve, Musculoskeletal, Spine

P5-1  
5-1 MHz Phased  
Scan Depth: 5–35 cm  
Exam Types: Abdomen, Cardiac, Focused Cardiac, Lung, Obstetrics, Orbital, Transcranial Doppler (TCD)

T8-3  
8-3 MHz Multi  
Scan Depth: 4–18 cm  
Exam Types: Cardiac, Cardiac Resuscitation

L12-3  
12-3 MHz Linear  
Scan Depth: 1.5–9 cm  
Exam Types: Arterial, Breast, Carotid, Lung, Musculoskeletal, Nerve, Ophthalmic, PIV, Superficial, Venous

L15-4  
15-4 MHz Linear  
Scan Depth: 1.5–6 cm  
Exam Types: Arterial, Breast, Carotid, Musculoskeletal, Nerve, Ophthalmic, PIV, Superficial, Venous

L19-5  
19-5 MHz Linear  
Scan Depth: 1–6 cm  
Exam Types: Arterial, Lung, Musculoskeletal, Nerve, Ophthalmic, PIV, Superficial, Venous

IC10-3  
10-3 MHz Curved  
Scan Depth: 3–15 cm  
Exam Types: Gynecology, Early Obstetrics, Obstetrics, Prostate

* Protected against water immersion for 30 minutes at a depth of up to 1 meter.
