

Ensure® Protein Max

Ensure® Protein Max is our most advanced adult nutrition formulation. Each 235-ml serving provides:

- 20 g of high-quality protein (23% energy from protein)
- 350 calories (1.5 Cal/mL)
- 1.5 g CaHMB
- 3 g scFOS fibre
- 26 vitamins and minerals

Indications for use:

- For hospitalized or community-based patients with increased energy and protein requirements due to:
 - presence or risk of malnutrition;
 - muscle mass loss or involuntary weight loss;
 - preparing for and recovering from surgery;
 - recovering from illness or injury.
- Prescribe in a medication pass of supplements program in doses of **60-90 ml**, between 3 times per day (TID) and 4 times per day (QID), with or without medications[†]
