

Neuroscience Patient Support Program

This program is subject to conditions and may be modified or terminated at any time.

Program offering

28 capsules or chewable tablets

- Capsule or chewable
- Up to 4 titrations (i.e. dose adjustments)
- No cost to the patient

Ongoing 20% benefit

- Provides a 20% benefit on patient's future VYVANSE prescription refills.
- Patient can receive this benefit regardless of coverage (private, public or none).

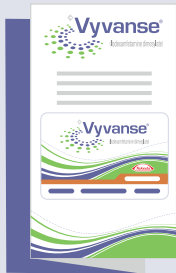

Please call the support team (1-855-442-9395) if you require more than 20% financial support

Patients can qualify for as much as 100% financial support, based on the completion of a financial means test.*

How to get a patient started with the program

1

Provide your patients with a VYVANSE card

The VYVANSE card can be found in the program brochure. Patients can present this card with their prescription for VYVANSE at a pharmacy to receive the free 28 capsules or chewable tablets.

3

Enrol for the ongoing 20% benefit*

Patients can fill out an online enrolment form on www.vyvanse-support.ca using a computer, tablet or smartphone.

Patients will be asked for their Client ID number (found on VYVANSE card) in order to complete the enrolment process.

Patients will receive confirmation that their card has been activated, usually within two hours.

2

Redeem the free 28 capsules or chewable tablets

* Patients should only enrol after they redeem the 28 capsules or chewable tablets. The financial means test takes into account their household income and number of dependents. For those receiving more than the 20% benefit, coverage will be active for 1 year, and will need to be renewed by contacting the Takeda Neuroscience Patient Support Program. A new financial means test may be required at the time of renewal.
