

OCALIVA[®] Indicated for the treatment of primary biliary cholangitis (PBC) in combination with ursodeoxycholic acid (UDCA) in adults with inadequate response to UDCA, or as a monotherapy in adults unable to tolerate UDCA. OCALIVA has been issued marketing authorization with conditions, pending the results of trials to verify its clinical benefit. Patients should be advised of the nature of the authorization.

PATIENT JOURNEY

Eligibility: A diagnosis of PBC by presence of two or more of the following - biochemical evidence of cholestasis based on ALP elevation (1.67 x ULN), positive AMA and/or liver biopsy consistent with PBC. Patient must have been on UDCA previously.

HCP ENROLLMENT

Use Enrollment Form (EF) - available in PDF format and can be faxed or emailed into the program

Ensure the form is completed correctly to avoid delays in getting the patient started

NURSE CASE MANAGER (NCM) ENROLLMENT
