

The Office of Lifelong Learning presents

# The ABC-QI Trial: A Provincial Quality Improvement Collaborative for Moderate and Late Preterm Infants

**Wednesday, November 30, 2022, 12:00 to 1:00 pm** (Mountain Standard Time, Alberta)

Moderate and late preterm infants represent large proportion of preterm birth; however, they are underrepresented in research and quality improvement initiatives. In this presentation, we will discuss the use of EPIQ methodology to address this gap in research and QI in moderate and late preterm infants.

Dr. Ayman Abou Mehrem

## Learning Objectives

- Understanding the burden of disease in moderate and late preterm infants.
- Establishing a QI collaborative beyond tertiary centres
- Using the Stepped Wedge-Cluster Randomized Trial design for QI research
