

CHILD HEALTH AND WELLNESS SPECIAL SEMINAR

Pharmacogenomic Research to Solve Drug-Induced Harm in Pediatric Patients with Cancer

Thursday, April 29, 2021

11 am – 12 pm MST

Register for Zoom access: bit.ly/3bHt0HH

Dr. Bruce Carleton, PharmD, FCP, FISPE

Director, Pharmaceutical Outcomes Programme
Professor, University of British Columbia
Senior Clinician Scientist,
BC Children's Hospital Research Institute

Dr. Carleton is a professor of Pediatrics, Medical Genetics, and Population and Public Health at the University of British Columbia. His research develops models for evaluating drug effectiveness, medication use models designed to improve patient health, and effective surveillance systems to improve the safe use of medication.
