

# Child Health and Wellness Seminar

*How do chemicals in our environment influence child and maternal health?*

**Dr. Deborah Dewey, PhD, RPsych**  
Professor, University of Calgary

---

Dr. Dewey's research investigates associations between maternal exposure to environmental chemicals during pregnancy. These associations include child and maternal health, children's brain development, and child cognition and behaviour. She is also examining if these chemicals modify how genes are expressed and if these changes are related to health and development.

**Monday, April 22, 2024**

**8:30 – 9:30 am**

**Register for Zoom access: [bit.ly/3V2AJsk](https://bit.ly/3V2AJsk)**

The [University of Calgary](https://www.ucalgary.ca) is driving science and innovation to transform the health and well-being of children and families. Led by the [Alberta Children's Hospital Research Institute](https://www.albertachildrenshospital.ca), top scientists across the campus are partnering with [Alberta Health Services](https://www.albertahealthservices.ca), the [Alberta Children's Hospital Foundation](https://www.albertachildrenshospital.ca), and our community to create a better future for children through research.
