

## CHILD HEALTH AND WELLNESS SEMINARS

# Building vessels for life: Using developmental biology and genetics to understand vascular developmental diseases

### Dr. Sarah Childs, PhD

Professor & Scientist, University of Calgary

Dr. Childs is a developmental biologist using zebrafish and human cells to understand blood vessel development, to better understand human disease. She studies both the initial formation and patterning of the vascular system as well as its longer-term stabilization.

**Monday, March 29, 2021**

**8:30 – 9:30 am**
