## Children with persistent pain after surgery: Opportunities to close the gap in pain care

**Nivez Rasic, BSc MD FRCPC**

Pediatric Anesthesiologist  
Clinical Associate Professor, Department of Anesthesiology,  
Perioperative and Pain Medicine, University of Calgary  
Medical Lead, Vi Riddell Pain & Rehabilitation Program  
Alberta Children's Hospital

**Katie Birnie, PhD RPsych**

Assistant Professor, Department of Anesthesiology,  
Perioperative and Pain Medicine, and Department of  
Community Health Sciences, University of Calgary  
Associate Scientific Director, Solutions for Kids in Pain  
Psychologist, Alberta Children's Hospital

### Objectives:

1. Describe the burden of pain in pediatric surgery and the pathophysiology of chronic post-surgical pain.
2. Recognize the challenges of youth, parents/caregivers, and healthcare professionals in preventing and managing pediatric chronic post-surgical pain.
3. Discover how health service solutions across the healthcare continuum can be co-designed to prevent pediatric chronic post-surgical pain.
