Neuromuscular Disease and Breathing – Let's help keep it easy! An approach to the pulmonary manifestations of NMD from home to the ICU

Dr. David Zielinski, MD, FCCP

Pediatric Respiriology

Associate Professor, Department of Pediatrics

Associate Chair (Education), Department of Pediatrics

McGill University

Objectives:

1. Appreciate an approach to recognizing the common pulmonary complications of neuromuscular disease (NMD).
2. Understand the role of interventions such as non-invasive ventilation, airway clearance and lung volume recruitment at different phases of NMD progression.
3. Develop an approach to acute respiratory failure in NMD.
