## Preventing Neonatal HSV Infections: Are We There Yet?

W. Christopher Golden, MD

### Objectives:

1. Identify current limitations and advantages in identifying adults and babies with herpes simplex virus (HSV) infections.
2. Recognize new molecular strategies to identify neonatal HSV infections.
3. Recall the unique features of the virus and the neonate that may underlie the likelihood and severity of neonatal HSV infection.
4. Evaluate standardized paradigms for diagnosis and evaluation of HSV infections in neonates and young infants.
5. Describe current data on adult vaccine therapy to prevent neonatal HSV infections.
