

# Medical Genetics Seminar Series

## A Micheil Innes, MD FRCPC FCCMG

Departments of Medical Genetics, and Pediatrics  
and Alberta Children's Hospital Research Institute,  
Cumming School of Medicine, University of Calgary  
and

**Caitlin Goedhart, MD**, PGY-2 Resident University of Saskatchewan

### *“The Landscape of Rare Genetic Disease in the Hutterite Brethren: Time for an update”*

Friday, May 3, 2024  
9:00 am – 10:00 am  
ACH Conference Room 2

#### LEARNING OBJECTIVES:

- 1) Describe elements of the history and structure of the Hutterite population that impact the distribution of rare disease in the population.
- 2) Recognize examples of rare diseases seen in this population, including examples that are both common and rare in other populations, including those that are the results of local discovery.
- 3) Develop an approach to a tailored differential diagnosis and work up plan in this population.
