

Urgent need for Clinical Core preceptors for Pediatrics Course 6

On behalf of Dr. Theresa Wu

Course 6, our undergraduate Pediatrics course, is still in **urgent need** of more preceptors for Clinical Core sessions. **Deadline to sign up is this Friday, September 10 at 5pm.**

Clinical Core is a critical component of the course. The focus is on basic history taking and physical exam skills. Minimal preparation time is required. Preceptors commit to 2 sessions of 2-hour clinical bedside teaching with a small group of medical students, with scheduling done at your discretion and convenience. Students will contact the preceptor directly to organize the sessions. Sessions can be held in the community offices, outpatient clinics, or on the ward. Preceptors are asked to recruit their own patients for these sessions. Please consider signing up, otherwise this component of the course will have to be altered for our students this year.
