

Inpatient/CCU Team Instructions

- Review admitted patients to confirm if they are a PRoMPT BOLUS participant. Identify fluid allocation on patient bracelet and/or Door signs and IV hang tags.
 - Documents and treatment assignment are colour coded
 - **Orange** = **0.9% Normal Saline (NS)**
 - **Green** = **Lactated Ringer's (LR)**
 - **Keep coloured IV hang tag and coloured patient bracelet with the patient**

- Hang a coloured door sign on door of patient room or at bedside (confirm the fluid assignment: **NS** or **LR**)

- Order all ongoing/future fluids in EPIC: **Includes ALL boluses and maintenance fluid required through 23:59 on the calendar day following randomization:**
 - Please order the fluid TYPE specified by randomization (**NS** or **LR**)
 - *Note: Hypotonic fluids (i.e. 0.45NS) are not considered appropriate for bolus or maintenance fluids in septic children and should be avoided*
 - **When and how much fluid should be decided based on clinical need by the clinical care team**
 - Obtain fluids from regular clinical inventory
 - Additives (i.e. Dextrose, KCl) can be used as needed
 - Document **ALL IV fluid given** to the patient during this time

- During patient transfer of care/handover verbally inform the receiving team that the child is participating in the PRoMPT BOLUS study
 - Mention that the patient should continue on the allocated study fluid TYPE (**NS** or **LR**) for any needed fluids ***through 23:59 on the calendar day following randomization***
 - **Keep coloured IV hang tag and coloured patient bracelet with the patient**
