

Inpatient/PICU Team Instructions

- Review admitted patients to confirm if they are a PRoMPT BOLUS participant. Identify fluid allocation on patient bracelet and/or IV hang tags.
 - Documents and treatment assignment are colour coded
 - **Yellow** = **0.9% Normal Saline (NS)**
 - **Green** = **Balanced Fluid (BF: Lactated Ringers or PlasmaLyte)**
 - **Keep coloured IV hang tag and coloured patient bracelet with the patient**

- Place order for **ALL boluses and maintenance fluid** provided in ED:
 - Order the fluid TYPE (**NS** or **BF**) specified by randomization information
 - *Note: Hypotonic fluids (i.e. 0.45NS) are not considered appropriate for bolus or maintenance fluids in septic children and should be avoided*
 - **When and how much fluid should be decided based on clinical need by the clinical care team**
 - Obtain fluids from clinical ED inventory
 - Additives (i.e. Dextrose, KCl) can be used as needed
 - Document **ALL IV and IO fluid given** to the patient during this time

- During the patient transfer of care/handover verbally inform the receiving team that the child is participating in the PRoMPT BOLUS study
 - Inpatient/PICU teams should continue to order the allocated study fluid TYPE (**NS** or **BF**) ***through 23:59 on the calendar day following randomization***
 - **Keep coloured IV hang tag and coloured patient bracelet with the patient**

- If patient meets Stopping Criteria, manage the child at your discretion, and:
 - Notify the study team that the child had been enrolled but met stopping criteria

- Any questions, please contact
 - **Dr. Gary Joubert** at Gary.Joubert@lhsc.on.ca or (519) 851-7989
 - **Dr. Gurinder Sangha** at Gurinder.Sangha@lhsc.on.ca or #15556
 - Study team pager (Mon-Fri, 08:00-16:00): **#17561** / Patrick.Siedlecki@lhsc.on.ca
