Interdisciplinary Pain Treatment

- Explore the 8 Categories of Action
- Choose your priorities

Interdisciplinary Treatment at the Chronic Pain Centre (CPC)

- Review options for Group and Individual Treatment at CPC
- Consider which areas you would benefit most from working on

Prepare for your Interdisciplinary Assessment on: _____

- Bring Your Treatment Plan with you to your Interdisciplinary Assessment
- Your team will help you decide on the best place to start considering your pain and priorities

Your Treatment Plan

Pain Science

We know pain is personal and always real

At your Intake meeting, the nurse shared some ideas about persistent pain. The number one message we hope you heard is: your pain is real.

- Whether you have had surgeries, injuries or a gradual start to your pain; it is real.

We also encouraged you to watch six pain videos to hear more about the science of pain and why learning about it helps you change your pain.

1. Tame the Beast https://www.tamethebeast.org/#tame-the-beast	Date Watched:
2. What is Pain Neuroscience? https://youtu.be/BrNZ1bXizDc	Date Watched:
3. The Relationship between Pain and Damage to our Bodies https://youtu.be/sK0yoljbFDc	Date Watched:
4. Why Your Pain is Variable https://youtu.be/ehXmFy_1ff4	Date Watched:
5. How Does Pain Change the Body https://youtu.be/qapc-q83O30	Date Watched:
6. Practical Pain Neuroscience https://youtu.be/L_5s8Oey6Q8	Date Watched:

You might have been surprised to hear that one in four people lives with persistent pain. You may have also learned some new ideas about pain, such as:

- Pain protects us, is personal and always real
- Hurt does not always mean harm → Sore and Safe
- Pain depends on the balance of danger messages (DIMs) and safety messages (SIMs)
- Persistent pain overprotects us and impacts recovery
- There are many ways to reduce pain and retrain the protective system
- Our body and brain will change, and we can direct the change!
- Active treatment strategies promote recovery

Your Treatment Plan

Please write down your thoughts about the following questions.

*What have you experienced that would suggest **your pain system has become over-protective?** (examples - pain is spreading, old injuries hurt, more sensitive to things, more things trigger pain)*

*How could you **retrain your pain system**, or help your pain system become less sensitive? (examples - manage my triggers, strengthen my body, address my fears)*

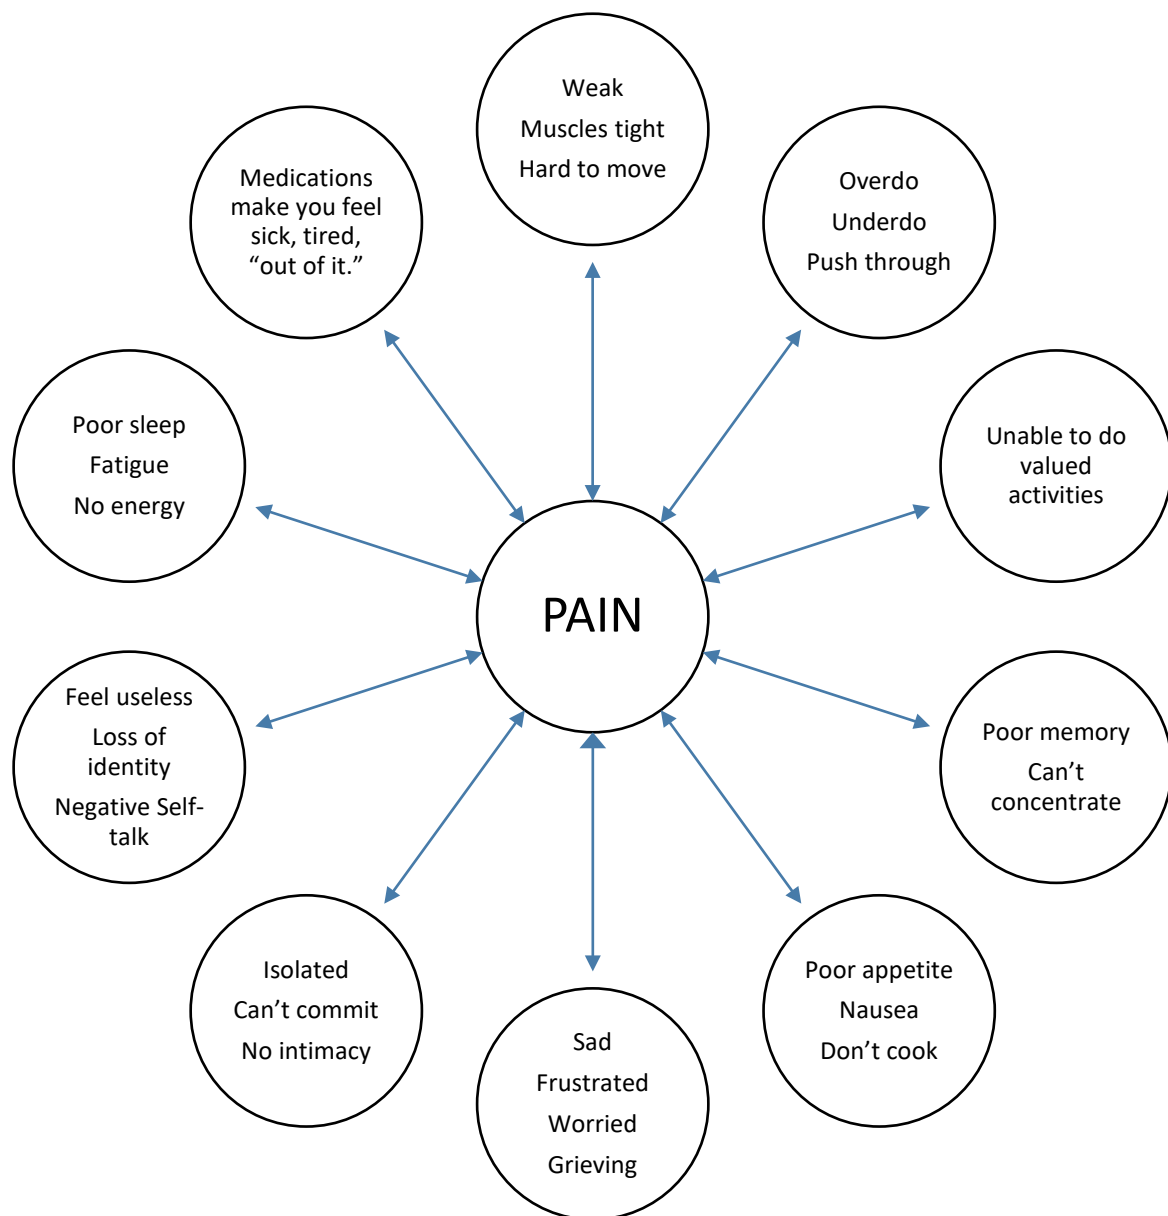

Your Treatment Plan

Impact of Pain

We know the impact of pain is personal and touches all parts of your life

How has pain impacted your life? Please write down or circle your top 3 impacts.

Your Treatment Plan

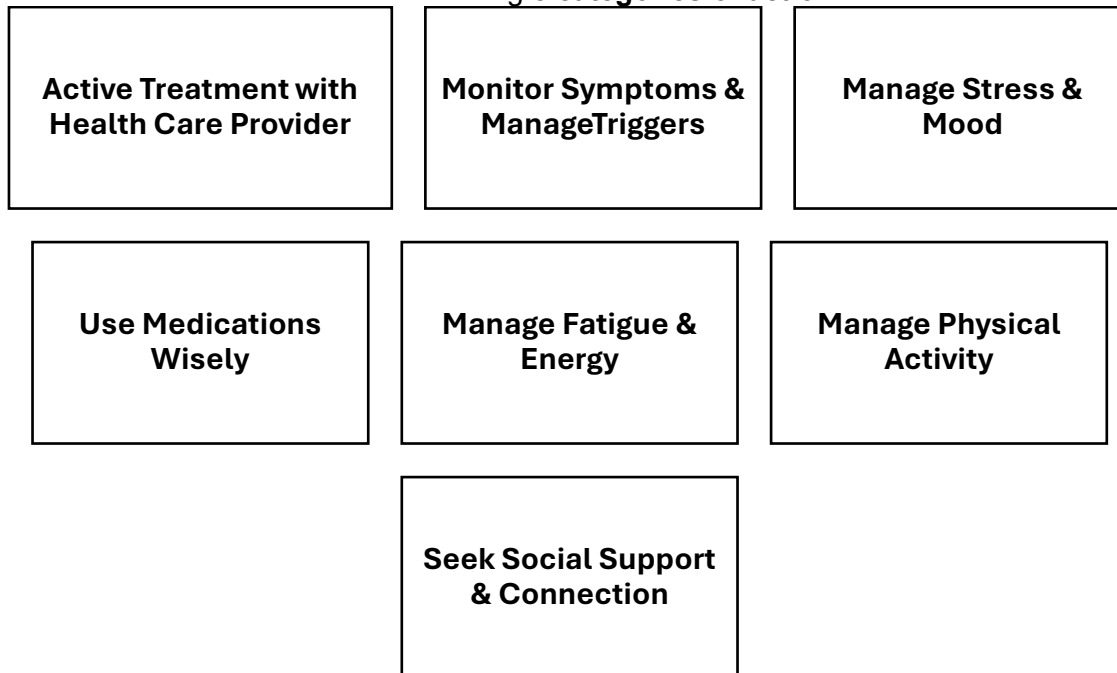

Interdisciplinary Pain Treatment

We know **ACTIVE** treatment strategies promote recovery

- Active treatments “retrain” the pain system to be less protective and decrease the impact of your pain on your life.

*What do you already **know** about active pain treatment? What do you already **do, use or practice**?*

We can think of Pain Treatment as having **8 categories of action**.

*Knowing what is going on in your life right now, which are the top **3 action areas** you would **benefit most** from working on? Where do you want to start?*

1.
2.
3.

Your Treatment Plan

Interdisciplinary Treatment at the Chronic Pain Centre

We know that working with a team is the most effective way for you to develop the knowledge and skills to retrain your pain system and manage your pain in the future.

- It is also the most effective way for health care providers to share information, ideas and skills for you and each other.

Thinking of the **top 3 action areas you** chose; you may wish to attend one of our treatment groups or work with an individual provider. Which groups or health care providers are most important for you right now?

Please see the next pages for brief descriptions of the treatment groups available and the roles of the health care providers at the CPC.

Please place a check mark ✓ by those you think you could benefit from the most.

Treatment Groups	Providers
<input type="checkbox"/> Active Pain Coping	<input type="checkbox"/> Kinesiologist
