

To upload your diabetes device:

Carelink (Medtronic Insulin Pumps):

Create Carelink Personal Login account: <https://carelink.minimed.eu/app/login> to upload your Medtronic insulin pump. Instructions from **Medtronic are here in this video:** <https://youtu.be/qciecGca9d8> .

1. We ask that you create and email reports to your educator each visit. OR
2. **Easier Option:** Take this one-time step to share your results with our clinic. Your data is looked at by clinic staff ONLY when they are actively providing services to you, and is not monitored regularly. Provide your clinic educator with your Carelink username, and ask them to send you an invitation to share your data. You will get an email asking you to verify your permission.

Clarity (Dexcom CGM):

Create Dexcom Clarity account <https://clarity.dexcom.eu> and sign into your Home User Clarity account.

1. We ask that you create and email reports to your educator each visit. OR
2. **Easiest Option:** Take this one-time step to share your results with our clinic. Your data is looked at by clinic staff ONLY when they are actively providing services to you. While in your Clarity Personal account, follow these instructions **Clarity Dexcom Patient Information Sheet** or [https://cumming.ucalgary.ca/sites/default/files/teams/90/Clarity Patient Information Sheet.pdf](https://cumming.ucalgary.ca/sites/default/files/teams/90/Clarity%20Patient%20Information%20Sheet.pdf) You will not have to repeat this step once set up, nor will you have to print out reports. You can stop sharing your data with our clinic at any time.

Glooko:

Create Glooko account here <https://my.glooko.com/> to upload most glucose meters or Omnipod, Tandem and Ypsomed insulin pumps and Dexcom (by inputting your Dexcom username and password)

1. We ask that you create and email reports to your educator each visit. OR
2. **Easiest Option:** Take this one-time step to share your results with our clinic. Your data is looked at by clinic staff ONLY when they are actively providing services to you. While signing up for Glooko, input our (Clinic) Code from the bottom of this sheet. **Glooko Patient Information Sheet**. You will not have to repeat this step once set up, nor will you have to print out reports. You can stop sharing your data with our clinic at any time.

Libreview (Libre):

Create account <https://libreview.com> or you may access from your Libre app.

1. We ask that you create and email reports to your educator each visit. OR
2. **Easiest Option:** Take this one-time step to share your results with our clinic. Your data is looked at by clinic staff ONLY when they are actively providing services to you. While in your Personal Libreview account, follow these instructions **Libreview Patient Instructions and clinic code**. You will not have to repeat this step once set up, nor will you have to print out reports. You can stop sharing your data with our clinic at any time. For video instructions on how to share your data using our practice ID code see the [video here](#).

Tandem Source:

1. Create a Tandem personal account at <https://sso.tandemdiabetes.com>.
2. **Easiest option:** Consider clicking on the Account icon at the top right > Account settings > Share Reports > Add Clinic. Select the province, then search for and add "Diabetes Centre Calgary (DCC)".
3. Or you may choose to email reports to your educator.
